# How can we leverage AI to automate testing?

Generate test cases for PractiTest using GitHub CoPilot

Not bad... but can we improve?

generation example / JIRA / artifacts  
/ what we do now / how it improves  
out job ?

# Smart user stories

JIRA ticket should provide

“as much as possible” AMAP information

Requirements

Acceptance criteria

Figma designs

Ref links to the code

Parent tickets, etc

In Italy **ASAP** means  
**A**perol **S**pritz **A**nd **P**asta 🍷 🍝

how can it help?

show bad examples and how can we improve

show good ticket and how we can improve

based on mini input

## JIRA Ticket Enhancement Board

|             |             |               |                 |         |

### AI Prompt Generator

Generate a structured prompt for AI enhancement of your JIRA ticket

☒ Include parent ticket ☒ Include child tickets ☒ Include resource links ☒ Include description

 Generate AI Prompt

# AI Hype again

AI can help us write a JIRA tickets for us huh?

and AI can write a test cases for us?

So maybe let AI write tests for us? Perform tests?

IT'S THE LOOK MY PARENTS GET  
WHENEVER SOMEONE BRINGS UP  
WHAT AI WILL DO TO THEIR JOBS.

SAME!
